Forensic Lecture Series | Fall 2014

## ABRAHAM LINCOLN: FORENSICS OF AN ASSASSINATION

WEDNESDAY  
OCTOBER 8, 2014  
4:00 PM

AT THE  
INDIANA MEDICAL  
HISTORY MUSEUM

RSVP

317-635-7329  
education@imhm.org

What if modern forensic investigation techniques were applied to the Abraham Lincoln assassination? What can we learn from the firearm that was recovered from Ford's Theater? From what distance did the shooting occur? And why did so many at the theater report *not* hearing the fatal shot?

Based on research conducted with a Derringer pistol and a "Spatter Head" that simulates the structure of the human cranium, **Douglas H. Boxler**, Firearms Investigator for the Indianapolis Marion County Forensic Services Agency, will provide some possible answers.

Indiana Medical  
History Museum

3045 West Vermont Street  
Indianapolis, IN 46222

The Forensic Science Lecture Series (FSLs), sponsored jointly by the Indiana Medical History Museum and the University of Indianapolis Archeology & Forensics Laboratory, was established in 2004 to help educate the public in the forensic sciences and related fields and to spotlight the fascinating stories that scientists have to tell.
