Angela Potter will present the history of sex education in Indiana since World War II through a series of film clips including the 1960 *Happy Little Hamsters*, accused of being "pornographic" in a 1969 lawsuit, to more recent films used by the Social Health Association of Indiana in its sex education classes.

This event marks the opening of a special exhibit "**Seventy Years of Leading the Way for Kids: The History of The Social Health Association of Indiana**" (August 6-October 31 at the Indiana Medical History Museum)
