Twisted: A Closer Look at Forensic DNA Analysis

presented by Krista E. Latham, PhD
Assistant Professor of Biology and Anthropology &
Director of the University of Indianapolis Molecular Anthropology Laboratory

Wednesday, April 18, 2012
4 to 5:15pm

Join us as Dr. Krista Latham discusses the use of DNA in medicolegal casework. Dr. Latham will introduce the audience to basic concepts in forensic DNA analysis, as well as discuss the complexities and misconceptions of interpreting the DNA information derived from crime scene samples through case examples. She will also highlight some of the research on primary DNA transfer that is currently being conducted in the University of Indianapolis Molecular Anthropology Laboratory. This lecture is free and open to the public. For more information, please contact Sarah Halter at education@imhm.org or call (317) 635-7329.

The Forensic Science Lecture Series (FSLs), sponsored jointly by the Indiana Medical History Museum and the University of Indianapolis Archaeology and Forensics Laboratory, was established in 2004 to help educate the public in the forensic sciences and related fields as well as to spotlight the fascinating stories that scientists have to tell.
