PRACTICING MEDICINE IN
NINETEENTH-CENTURY ART

How did country doctors see themselves in the early nineteenth century? How did their patients and colleagues see them? Dr. Kate Scott of the Indiana Historical Society takes a look at paintings of rural physicians, in particular Ammi Phillips' shocking *Peter Guernsey, the Eye Doctor*. We'll examine the messages doctors created in their endeavor to challenge existing stereotypes and to earn the respect of both rural patients and elite urban practitioners.
